## NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

---

### 1. CORPORATE INFORMATION

---

Medgold Resources Corp. (formerly Emerick Resources Corp.) (the “Company”) is a public company incorporated and domiciled in British Columbia and engaged in the acquisition and exploration of resource properties in Italy, Spain, and Portugal.

The address of the Company’s head office and principal place of business is #650 – 200 Burrard Street, Vancouver, BC, Canada V6C 3L6.

#### *Reverse Asset Acquisition*

On December 10, 2012, the Company completed a reverse asset acquisition transaction (the “Acquisition”) and concurrently, changed its name to Medgold Resources Corp. and graduated from the NEX Board of the TSX Venture Exchange (“TSX-V”) to a Tier 2 listing on the TSX-V.

Upon completion of the Acquisition, the Company issued 32,287,500 common shares to the shareholders of Medgold Resource Ltd. (“Medgold UK”), a private company incorporated on April 12, 2011 under the Companies Act 2006 of England and Wales, in exchange for a 100% of the issued and outstanding shares of Medgold UK.

As a result of the Acquisition, the shareholders of Medgold UK acquired 61.6% of the outstanding shares of the Company and Medgold UK gained control of the Company’s Board of Directors. For accounting purposes, the Acquisition was considered to be outside the scope of IFRS 3 *Business Combinations* since the Company’s activities prior to the Acquisition were limited to the management of cash resources and the maintenance of its listing and did not constitute a business. The Acquisition was accounted for consistent with IFRS 2 *Share-based Payment* (“IFRS 2”) whereby Medgold UK was deemed to have issued shares in exchange for the net assets of the Company together with its listing status at the fair value of the consideration received by Medgold UK. As a result, the acquisition was accounted for as a capital transaction, with Medgold UK being identified as the accounting acquirer and the equity consideration being measured at fair value. The resulting statements of financial position as at March 31, 2013 and December 31, 2012 are presented as a continuance of Medgold UK and the comparative figures presented in the condensed interim consolidated financial statements for the period ended March 31, 2012 are those of Medgold UK.

### 2. BASIS OF PREPARATION

---

#### **Statement of Compliance**

These condensed interim consolidated financial statements are prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* under International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”). These condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements of the Company, except for the accounting policies which have changed as a result of the adoption of new and revised standards and interpretations which are effective January 1, 2013. These condensed interim consolidated financial statements do not contain all of the information required for full annual financial statements. Accordingly, these condensed interim consolidated financial statements should be read in conjunction with the Company’s most recent annual consolidated financial statements, which were prepared in accordance with IFRS as issued by the IASB.

(Exploration Stage Company)

## NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

---

### 2. BASIS OF PREPARATION (continued)

---

#### Basis of Measurement

These condensed interim consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value. The condensed interim consolidated financial statements are presented in Canadian dollars ("CDN").

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 5.

#### Nature of Operations and Ability to Continue as a Going Concern

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for its next fiscal year. Realization values may be substantially different from carrying values as shown and these condensed interim consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. At March 31, 2013, the Company had not yet achieved profitable operations, has accumulated losses of \$2,889,970 since its inception, and expects to incur further losses in the development of its business, all of which cast significant doubt about the Company's ability to continue as a going concern. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

#### Basis of Consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. A subsidiary is an entity in which the Company has control, directly or indirectly, where control is defined as the power to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. All material intercompany transactions and balances have been eliminated on consolidation.

Details of the Company's subsidiaries as at March 31, 2013 are as follows:

Name	Place of incorporation	Ownership %	Principal activity
Medgold Resource Ltd.	Great Britain	100%	Administrative company
Medgold Minera Sociedad Limitada	Spain	100%	Exploration company

#### Foreign Currency Translation

The functional and presentation currency of the Company is the Canadian dollar. Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on dates of transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. The Company has determined that the functional currency of its foreign subsidiaries is the British Pound Sterling. Assets and liabilities are translated to the presentation currency at the yearend rates of exchange, and the results of their operations are translated at average rates of exchange for the year. The resulting translation adjustments represent accumulated other comprehensive income in shareholders' equity.

## NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

---

### 3. ADOPTION OF NEW AND AMENDED IFRS PRONOUNCEMENTS

---

#### *IAS 1 Presentation of Financial Statements (Amendment)*

The amendments to IAS 1 require the grouping of items within other comprehensive income that may be reclassified to profit or loss and those that will not be reclassified. The statement of comprehensive income in these condensed interim consolidated financial statements has been amended to reflect the presentation requirements under the amended IAS 1.

The mandatory adoption of the following new and revised accounting standards and interpretations on January 1, 2013 had no significant impact on the Company's financial statements for the current or prior periods presented:

#### *IFRS 10 Consolidated Financial Statements*

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under previous IFRS, consolidation was required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 Consolidation - Special Purpose Entities and parts of IAS 27 Consolidated and Separate Financial Statements.

#### *IFRS 11 Joint Arrangements*

IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under previous IFRS, entities had the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31 Interests in Joint Ventures and SIC-13 Jointly Controlled Entities - Non-monetary Contributions by Venturers.

#### *IFRS 12 Disclosure of Interests in Other Entities*

IFRS 12 establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities.

#### *IFRS 13 Fair Value Measurement*

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under previous IFRS, guidance on measuring and disclosing fair value was dispersed among the specific standards requiring fair value measurements and in many cases did not reflect a clear measurement basis or consistent disclosures.

#### *Amendments to other standards*

In addition, there have been other amendments to existing standards, including IAS 19 *Post-Employment Benefits*, IAS 27 *Separate Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*. IAS 27 addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. IAS 28 has been amended to include joint ventures in its scope and to address the changes in IFRS 10 to IFRS 13.

# Medgold Resources Corp. (formerly Emerick Resources Corp.)

(Exploration Stage Company)

## NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

---

### 4. STANDARDS, AMENDMENTS AND INTERPRETATIONS NOT YET EFFECTIVE

---

The following new standard has been issued by the IASB but is not yet effective:

#### *IFRS 9 Financial Instruments*

IFRS 9 is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015. The Company is in the process of evaluating the impact of the new standard.

### 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

---

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive loss in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

The key areas of judgment applied in the preparation of the consolidated financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- a) The determination of the Company's functional currency;
- b) The carrying value of the investment in exploration and evaluation assets and the recoverability of the carrying value;
- c) Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects; and
- d) Although the Company has taken steps to identify any decommissioning liabilities related to mineral properties in which it has an interest, there may be unidentified decommissioning liabilities present.

The key estimates applied in the preparation of the financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- a) The Company may be subject to income tax in several jurisdictions and significant judgment is required in determining the provision for income taxes. During the ordinary course of business and on dispositions of mineral property or interests therein, there are transactions and calculations for which the ultimate tax determination is uncertain. As a result, the Company recognizes tax liabilities based on estimates of whether additional taxes and interest will be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events, and interpretation of tax law. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact income tax expense in the period in which such determination is made;
- b) In estimating the fair value of share-based payments management is required to make certain assumptions and estimates. Changes in assumptions used to estimate fair value could result in materially different results.

(Expressed in Canadian Dollars)

---

#### **7. EXPLORATION AND EVALUATION ASSETS (continued)**

---

##### **Italy** (continued)

###### b) Frassine - Grasceta Property

In 2012, the Company was granted two gold exploration licences in Italy called Frassine and Grasceta. The areas the two licenses cover are adjoined. Two exploration bonds totaling \$12,510 (€10,000) have been made regarding these two licenses.

##### **Portugal**

In 2012, the Company applied for three exploration licences in northern Portugal. During the current period, one licence known as Vila de Rei was granted and the Company has been issued an exclusive right to acquire the other two licences.

The Company has a commitment to post a bond of €136,960 with the Portugal mining authority for the Vila de Rei licence. The amount was paid subsequent to March 31, 2013.

##### **Spain**

###### a) Pinzas Project

Pursuant to a binding letter of intent ("LOI") with Ormonde Mining PLC ("Ormonde") signed in July 2011, and amended in April and September 2012, the Company was provided access to Ormonde's database on a 2,400 square kilometre area in southern Galicia, Spain. In consideration thereof, the Company agreed to undertake €100,000 in exploration of the project area, which expenses could be incurred through the cost of licence applications. During the current period, Ormonde agreed to transfer all of its rights to the project area to the Company, with Ormonde retaining a 1.5% NSR royalty on any future gold production from the project area.

The Company currently has nine gold exploration permit applications in place within the Ormonde project area, which is known as the Pinzas Project. Three of the applications were submitted in 2012 and completed during the current period with acquisition costs totalling \$33,852 being recorded. During the current period, new applications for six adjoining licences were submitted which are subject to public tender.

###### b) Calzadilla Property

In 2012, the Company submitted a gold exploration permit application in the Province of Caceres, Spain known as the Calzadilla Property. This application is subject to public tender.

###### c) Other

In 2012, the Company entered into an agreement whereby a third party performed due diligence services on a potential property acquisition in Spain. If the acquisition proceeds, the Company has a commitment to make a payment of €50,000 in June 2013.

#### **8. SHARE CAPITAL AND RESERVES**

---

##### **Authorized**

The Company is authorized to issue an unlimited number of common shares without par value.

There was no share capital activity during the three month period ended March 31, 2013.

##### **Nature of Equity Reserves**

The reserve recorded in equity includes Accumulated Other Comprehensive Loss. Accumulated Other Comprehensive Loss is used to record the foreign exchange translation adjustments for subsidiaries that have a different functional currency than the Company.

##### **Escrow Shares**

As at March 31, 2013, there were 14,680,032 shares (December 31, 2012: 14,680,032) held in escrow.

##### **Warrants and Options**

There were no share purchase warrants or share options issued or outstanding as at March 31, 2013 or December 31, 2012.

#### **9. SHARE-BASED PAYMENTS**

---

##### **Expenses Arising from Share-based Payment Transactions**

There were no expenses arising from share-based payment transactions recognized during the three month periods ended March 31, 2013 and 2012 as part of share-based compensation expense.

##### **Amounts Capitalized Arising from Share-based Payment Transactions**

There were no expenses arising from share-based payment transactions that were capitalized during the three month periods ended March 31, 2013 and 2012 as part of exploration and evaluation assets.

(Expressed in Canadian Dollars)

### 11. RELATED PARTY TRANSACTIONS AND BALANCES

The Company's related parties with transactions during the three months ended March 31, 2013 consist of directors, officers and the following companies with common directors:

Related party	Nature of transactions
Radius Gold Inc. ("Radius")	Shared office, administrative and exploration related charges
Gold Group Management Inc. ("Gold Group")	Shared office, administrative and exploration related charges
Mill Street Services Ltd. ("Mill Street")	Management services

#### Key management compensation

The Company has identified certain of its directors and senior officers as its key management personnel. Included for the periods ended March 31, 2013 and 2012 at their exchange amounts are the following items paid or accrued to key management personnel and/or companies with common directors. These transactions are in the normal course of operations.

	Three months ended March 31,	
	2013	2012
Management fees	\$ 46,500	\$ 67,263
Salaries and benefits	4,583	-

Related party transactions for the period ended March 31, 2013, in addition to related party transactions disclosed elsewhere in the condensed interim consolidated financial statements, comprise the following:

- The Company reimbursed Gold Group, a company controlled by the Chief Executive Officer of the Company, \$69,726 (2012: \$Nil) for shared administration costs consisting of \$16,006 in general and administration, \$29,352 in salaries and benefits, \$16,857 in shareholder communications, \$202 in transfer agent and regulatory fees, and \$7,309 in travel and accommodation. Salaries and benefits include those for a Director, the Chief Financial Officer and the Corporate Secretary. Effective July 1, 2012, Gold Group is reimbursed by the Company for these shared costs and other business related expenses paid by Gold Group on behalf of the Company. There were no transactions with Gold Group during the comparative period.
- Prepaid expenses and deposits include an amount of \$61,000 (December 31, 2012: \$68,113) paid to Gold Group as a deposit pursuant to the office and administrative agreement and other administrative expenses paid in advance on the Company's behalf.
- Amounts due to related parties as of March 31, 2013 consist of \$93,139 (December 31, 2012: \$23,012) owing to Gold Group, \$17,520 (December 31, 2012: \$17,520) owing to Radius, \$26,880 (December 31, 2012: \$16,800) owing to Mill Street, a company controlled by the Chief Executive Officer of the Company, \$22,740 (December 31, 2012: \$23,863) owing to David Hall, a Director of the Company, \$22,740 (December 31, 2012: \$23,862) owing to Jeremy Martin, a Director of the Company, and \$12,500 (December 31, 2012: \$Nil) owing to Daniel James, a Director of the Company. The amounts for Radius and Mill Street are unsecured, interest free and have no specific terms of repayment. The amounts for Gold Group and Daniel James are due on a monthly basis. The amounts for David Hall Jeremy Martin are due no later than December 10, 2014.

## NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

### 12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company is exposed through its operations to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other business, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

#### General Objectives, Policies and Processes:

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's finance function. The Board of Directors receive periodic reports through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

#### a) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk: foreign currency risk, interest rate risk, and equity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. As at March 31, 2013, the Company is exposed to foreign currency risk and interest rate risk.

#### Foreign Currency Risk

As at March 31, 2013, the Company is exposed to currency risk through the following financial assets and liabilities denominated in currencies other than the Canadian dollar:

	March 31, 2013			December 31, 2012	
	British Pound Sterling (CDN equivalent)	US Dollars (CDN equivalent)	Euros (CDN equivalent)	British Pound Sterling (CDN equivalent)	US Dollars (CDN equivalent)
Cash	\$ 57,529	\$ 978,509	\$ 9,831	\$ 450,095	\$ 7,577
Accounts payable and accrued liabilities	(295,047)	-	(48,540)	(334,522)	-
Due to related parties	(57,980)	-	-	(47,725)	-
<b>Net exposure</b>	<b>\$ (295,498)</b>	<b>\$ 978,509</b>	<b>\$ (38,709)</b>	<b>\$ 67,848</b>	<b>\$ 7,577</b>

## **Medgold Resources Corp. (formerly Emerick Resources Corp.)**

(Exploration Stage Company)

### **NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

**For the three months ended March 31, 2013**

(Expressed in Canadian Dollars)

---

#### **12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)**

---

##### a) Market Risk (continued)

Based on the above net exposures at March 31, 2013, a 10% depreciation or appreciation of the above currencies against the Canadian dollar would approximately result in a \$64,400 increase or decrease in the Company's after tax net earnings, respectively.

##### *Interest Rate Risk*

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not have any borrowings as at March 31, 2013. Interest rate risk is limited to potential decreases on the interest rate offered on cash held with Canadian and British financial institutions. The Company considers this risk to be limited.

##### b) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents. The Company limits exposure to credit risk by maintaining its cash with large financial institutions. The Company does not have cash and cash equivalents that are invested in asset based commercial paper.

##### c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. At March 31, 2013, the Company had working capital of \$661,838 (December 31, 2012: \$148,728) available to apply against short-term business requirements.

##### **Determination of Fair Value:**

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The Statements of Financial Position carrying amounts for cash, accounts payables and accrued liabilities, and due to related parties approximates fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

## Medgold Resources Corp. (formerly Emerick Resources Corp.)

(Exploration Stage Company)

### NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended March 31, 2013

(Expressed in Canadian Dollars)

---

## 12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

---

### Fair Value Hierarchy:

Financial instruments that are measured subsequent to initial recognition at fair value are categorized in Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of the Company's financial assets measured at fair value on a recurring basis as of March 31, 2013 were calculated as follows:

	<b>Balance at March 31, 2013</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
Financial Asset:				
Cash	\$ 1,130,803	\$ 1,130,803	\$ -	\$ -

---

## 13. CAPITAL MANAGEMENT

---

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its properties and to maintain flexible capital structure for its projects for the benefit of its stakeholders. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or adjust the amount of cash and cash equivalents. Management reviews the capital structure on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements. The Company's capital resources as of March 31, 2013 are not sufficient to cover its corporate operating costs and carry out exploration activities for the next twelve months. In order to carry out planned exploration programs and business objectives, the Company will need to raise additional capital. The Company believes it will be able to raise additional debt or equity capital as required, but recognized the uncertainty attached thereto (see Note 15).

### 14. SEGMENTED REPORTING

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision-making group, in deciding how to allocate resources and in assessing performance. All of the Company's operations are within the mining sector relating to precious metals exploration. Management of exploration programs is centralized in England. Due to the geographic and political diversity, the Company's exploration operations are decentralized whereby regional corporate offices provide support to the exploration programs in addressing local and regional issues. The Company's operations and assets are therefore segmented on a district basis.

Details of identifiable assets by geographic segments are as follows:

Period ended March 31, 2013	Canada	England	Italy	Spain	Portugal	Consolidated
Exploration expenditures	\$ -	\$ -	\$ 177,582	\$ 37,673	\$ 6,238	\$ 221,493

(Expressed in Canadian Dollars)

---

#### **15. EVENT AFTER THE REPORTING DATE**

---

On April 12, 2013, the Company closed a \$975,000 non-brokered private placement of debentures which are convertible into 6,500,000 common shares of the Company at the rate of \$0.15 per share. The debentures bear interest at the rate of 8% per annum and are convertible into shares until April 11, 2015. The debenture holder was also issued warrants to purchase up to 6,500,000 common shares of the Company exercisable until April 11, 2014 at a price of \$0.15 per share.

**(formerly Emerick Resources Corp.)**

**MANAGEMENT’S DISCUSSION AND ANALYSIS  
Quarter End Report – March 31, 2013**

**General**

This Management’s Discussion and Analysis (“MD&A”) supplements, but does not form part of, the unaudited condensed interim consolidated financial statements of the Company for the three months ended March 31, 2013. The following information, prepared as of May 28, 2013, should be read in conjunction with the Company’s unaudited condensed interim consolidated financial statements for three months ended March 31, 2013 and the related notes contained therein. The Company reports its financial position, results of operations and cash flows in accordance with International Financial Reporting Standards (“IFRS”). In addition, the following should be read in conjunction with the Consolidated Financial Statements of the Company for the year ended December 31, 2012 and the related MD&A. All amounts are expressed in Canadian dollars unless otherwise indicated. The March 31, 2013 financial statements have not been reviewed by the Company’s auditors.

Additional information relevant to the Company’s activities can be found on SEDAR at ([www.sedar.com](http://www.sedar.com)).

**Forward Looking Information**

This MD&A may contain “forward-looking statements” that reflect the Company’s current expectations and projections about its future results. When used in this MD&A, words such as “will”, “may”, “should”, “estimate”, “intend”, “expect”, “anticipate” and similar expressions are intended to identify forward-looking statements, which, by their very nature, are not guarantees of the Company’s future operational or financial performance.

Forward-looking statements are statements that are not historical facts, and include but are not limited to:

- a) Estimates and their underlying assumptions;
- b) Statements regarding plans, objectives and expectations with respect to the effectiveness of the Company’s business model, future operations, the impact of regulatory initiatives on the Company’s operations, and market opportunities;
- c) General industry and macroeconomic growth rates;
- d) Expectations related to possible joint or strategic ventures; and
- e) Statements regarding future performance.

Forward-looking statements used in this MD&A are subject to various risks, uncertainties and other factors, most of which are difficult to predict and generally beyond the control of the Company. These risks, uncertainties and other factors may include, but are not limited to unavailability of financing, failure to identify commercially viable mineral reserves, fluctuations in the market valuation for commodities, difficulties in obtaining required approvals for the development of a mineral project, and other factors.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this MD&A or as of the date otherwise specifically indicated herein. Due to risks, uncertainties and other factors, including the risks, uncertainties and other factors identified above and elsewhere in this MD&A, actual events may differ materially from current expectations. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by securities law.

### **Business of the Company**

The Company is a Vancouver-based mineral exploration company engaged in the acquisition and exploration of precious and base metals properties. As a result of the transaction described below, the Company is focusing its business on acquiring and exploring mineral properties in economically stressed, but politically stable European countries that are seeking foreign investment to invigorate the mining sector.

### **Acquisition of Medgold Resource Ltd.**

On December 10, 2012, the Company completed a reverse asset acquisition (the “Acquisition”) of Medgold Resource Ltd. (“Medgold UK”), a UK-based private company focused on the exploration and development of precious and base metals in Western Europe. To acquire Medgold UK, the Company issued 32,287,500 shares in its capital stock to Medgold UK’s shareholders in proportion to their respective shareholdings in Medgold UK. The Company’s resulting issued capital is 52,416,078 shares, of which Medgold UK’s shareholders own 61.6%. All outstanding options in the Company were cancelled.

As of the closing of the Acquisition, Ralph Rushton and Simon Ridgway remained as Directors of the Company, and Mr. Ridgway is Chief Executive Officer and Chairman of the Board. Daniel James was appointed as Director and President of the Company and was joined on the Board by David Hall and Jeremy Martin, all of whom are directors of Medgold UK.

As a result of the completion of the Acquisition, the Company’s listing was graduated from the NEX board to Tier 2 of the TSX Venture Exchange as a resource issuer. As well, the Company’s name was changed to “Medgold Resources Corp.”.

For accounting purposes, the Acquisition was considered to be outside the scope of IFRS 3 *Business Combinations* since the Company’s activities prior to the Acquisition were limited to the management of cash resources and the maintenance of its listing and did not constitute a business. The Acquisition was accounted for consistent with IFRS 2 *Share-based Payment* (“IFRS 2”) whereby Medgold UK was deemed to have issued shares in exchange for the net assets of the Company together with its listing status at the fair value of the consideration received by Medgold UK. As a result, the acquisition was accounted for as a capital transaction, with Medgold UK being identified as the accounting acquirer and the equity consideration being measured at fair value. The resulting statements of financial position as at March 31, 2013 and December 31, 2012 are presented as a continuance of Medgold UK and the comparative figures presented in the condensed interim consolidated financial statements for the period ended March 31, 2012 are those of Medgold UK.

### **The Properties**

The Company has licences granted and under application in Italy, Portugal and Spain, targeting gold and base metal projects. These countries are favourable jurisdictions, with robust mining codes, backed by administrations which are actively seeking both foreign investment and commodity exploration companies.

#### *Italian Projects*

The Company holds three gold exploration licences in Italy, each 8 square kilometers in area, called Pietratonda, Frassine, and Grasceta, covering gold mineralization hosted within silicified limestones known as jasperoids. The Frassine and Grasceta licences are adjoined and located 43 km from the Pietratonda licence. Mineralization at all three projects is controlled by steeply-dipping normal and thrust faults, which are considered to be feeder structures, and also low-angle thrust faults with low-grade mineralization occurring at impermeable limestone-flysch contacts, forming aprons of flat-lying mineralization. The Company’s licences cover potentially high-grade, limestone-hosted Carlin-type epithermal gold targets, one of the most prospective gold deposit types.

The projects are located in the Colline Metallifere mineral belt (the “Metal-Bearing Hills”) which exhibits many geological similarities with deposits in the Carlin Trend, Nevada such as the structural setting, host rocks and

general controls, yet the region has received very little modern exploration. The Colline Metallifere extends over 100 km in a northwest-striking direction and hosts numerous mineral occurrences. The region currently has 32 active quarrying and mining projects.

#### Pietratonda License

In April 2012 the Company carried out programs of geological mapping, geochemical exploration and satellite image interpretation. Geochemical exploration comprised soil sampling, rock sampling and limited channel sampling. Gold values in soils range from below detection (<0.005 ppm) to a maximum of 0.415 ppm, while gold values in rocks range from below detection (<0.005 ppm) to a maximum of 1.015 ppm. Together they show anomalous values over an area of about 1,400 m north-south by 500 m wide, which is open to the north and south. This is associated with anomalous arsenic, barium, mercury, molybdenum, antimony, thallium and zinc, which are elements typically associated with sediment-hosted, epithermal gold deposits.

In April 2013, the Company announced results of a recently completed exploration program at the Pietratonda licence consisting of a two-phase program of grid-rock chip and float sampling. Initial samples were collected on a 50 by 50 meter sample grid, with zones of anomalism later infilled by a 25 by 25 meter sample grid. Coincident with the sampling, the Company completed detailed geological mapping noting lithology, structure, and alteration.

A total of 273 samples were collected from this phase (including 49 quality control (QC) samples), with 27% of samples (excluding QC samples) yielding greater than 0.1 g/t Au and an average grade of all samples of 0.125 g/t Au. Gold results varied from below detection up to highs of 2.43, 1.21 and 1.07 g/t, and antimony from 1.78 ppm to 15 samples above 1 percent, with highs of 5.17, 7.08 and 8.42 percent. Gold and antimony define a coincident anomaly over 600 by 200 metres. Arsenic and mercury are also strongly anomalous, with highs of 0.51, 0.14 and 0.10 percent As, and 104.5, 69.2 and 47.4 ppm Hg, both of which showing a good correlation with gold, and thus highlighting their use as pathfinder elements. A sample map and table of results are available on the Company's website at <http://www.medgoldresources.com/medgold-italy-mining.asp>.

These results are considered to represent a distal zone of mineralization associated with a high-grade and high-angle structural feeder-zone, which is commonly found in Carlin-type deposits. Vector analysis of the geochemistry highlights a strong increase in Au-Sb anomalism toward the inferred high-angle feeder faults. These represent clear exploration drill targets where Au-Sb grades are expected to increase with depth.

The next phase of work will involve a limited induced polarization (IP) geophysical study, to aid in the better definition of drill targets and the possible identification of high-angle faults associated with jasperoids and expected pyrite-stibnite mineralization at depth. This will be carried out later in 2013. A drill program is tentatively planned for early 2014, dependent on IP results and once all the necessary permits have been received.

The samples were prepared and analysed for gold by fire assay with atomic adsorption finish by ALS Minerals at the Rosia Montana Laboratory, Romania. Multielements were analyzed by inductively coupled plasma mass spectrometer (ICP-MS) and inductively coupled plasma emission spectrometer (ICP-AES) on a sample split sent to the ALS Minerals laboratory in Vancouver. Blank, certified standard reference materials, and field and laboratory duplicates were routinely inserted for quality assurance and quality control.

#### Frassine-Grasceta Licences

A drilling campaign conducted at Frassine-Grasceta in 1991 by a joint-venture between Anglo American Corporation (now Anglo American plc) and Agip Miniere (a subsidiary of the Agip oil company) completed 7 diamond drill holes for 600 metres which returned intersections of up to 3.15 g/t Au over 4 metres and 0.94 ppm Au over 19 metres in two holes, with a highest sample value of 6.4 g/t Au. *These are historical data which have not been verified by the Company and are quoted for information purposes.*

Medgold UK collected 12 reconnaissance rock samples at Frassine-Grasceta in November 2011, which yielded a high of 1.02 g/t Au from a grab sample, and 0.41 g/t Au over 12 metres from a composite channel-chip sample.

Mineralization at Frassine-Grasceta is controlled by high-angle feeder structures, and hosted by jasperoids which typically occur on low-angle thrust faults and also in high-angle normal faults. High-grade gold mineralization is typically associated with the latter and can also be associated with localized copper-lead-zinc mineralization.

In April 2013 the Company undertook a program of rock sampling at a sample grid of 50 by 50 metres over key areas of mapped jasperoid mineralization. Samples were submitted to ALS Minerals at the Rosia Montana Laboratory, Romania, with final assay results pending. These are expected in late Q2 2013.

## *Portuguese Projects*

The Company has applied for three exploration licences in northern Portugal, targeting orogenic and intrusion-related gold systems, similar to Astur Gold's Salave project, in northwest Spain, which hosts measured resources of 2.1 Mt at 3.88 g/t for 268,000 oz Au, and indicated resources of 15.8 Mt at 2.79 g/t for 1.4 M oz Au (see "Technical Report on Salave Gold Deposit, Spain" by Scott Wilson RPA, February 25, 2010: [http://www.asturgold.com/data/2011/12/salave\\_43-101.pdf](http://www.asturgold.com/data/2011/12/salave_43-101.pdf)). This mineral resource is quoted for information purposes only and is not necessarily an indication of the potential of the Company's projects. At Salave, gold is typically vein-hosted, locally attaining bonanza grade status, with veins and associated alteration, commonly extensive over kilometres of strike. The Romans, who mined the high-grade Au-As veins, conducted extensive exploration and exploitation programs throughout the northern Portugal region, with many of the prospects now the focus of modern-day exploration.

In February 2013, the Portuguese mining authorities granted to the Company the exclusive option on two of the exploration licence applications, called Boticas and Vila de Rei. The Vila de Rei licence was issued in March 2013 and the Boticas licence is expected to be issued in late Q2 2013.

### Vila de Rei Gold Project

The Vila de Rei licence is located in central Portugal, covering an area of 300 sq km, targeting sediment-hosted orogenic gold mineralization. The project area covers 40 line km of a principal regional structure and comprises four previously identified geochemical anomalies, the largest of which extends over 3 km. Rock chip sampling by a previous explorer in the mid 2000's gave 33 out of 247 samples above 1 g/t Au with maximum values of 24.72, 22.85 and 19.24 g/t Au. *The sampling is historical in nature, has not been verified by the Company, and is quoted for information purposes only.*

Recent field work, undertaken in April 2013, comprised reconnaissance work over the Pampilhal and Rei anomalies, but also involved licence-wide prospecting. A total of 106 rock grab samples were collected, (including 11 QC samples), with 55 from Pampilhal prospect and 40 from Rei prospect. Fifty-five rock samples were collected from the Pampilhal prospect with 41 (75%) yielding greater than 0.1 g/t Au and 11 (20%) greater than 1.0 g/t Au.

Preliminary exploration at the Pampilhal prospect outlined highly anomalous gold mineralization associated with silicification over a 2.4 km by 1.3 km area, including over 2.8 km combined strike length of linear, structurally-controlled gold-bearing silica ridges or "ribs". Sampling maps have been posted on Medgold's website at [www.medgoldresources.com/vila-de-rei.asp](http://www.medgoldresources.com/vila-de-rei.asp).

The program of work identified a number of key observations:

- The longest exposed silica rib, named Dan's Ridge, extends for over 1.2 km and returned anomalous gold along its entire length, with assays ranging from trace to 12.45 g/t Au and including samples of 3.48 g/t and 1.06 g/t Au. Thirty-two rock grab samples were collected along its length at roughly 40-100 m intervals.
- The Western Ridge, in the northern end of the prospect, is exposed over 300 m and returned remarkably consistent high gold assays for a first-pass sampling program. Five rock grab samples were collected along its length at roughly 75-100 m intervals, returning 2.10 g/t, 1.20 g/t, 1.45 g/t, 2.36 g/t and 1.15 g/t Au.
- In the southern end of the prospect, the Southeast Ridge is exposed over 365 m. Eight rock grab samples were collected, yielding results from 0.046 g/t to 3.76 g/t Au and including samples of 3.32 g/t Au and 1.84 g/t Au.

At the Rei prospect, the Company collected a total of 40 rock grab samples, and has identified a new zone of silica-hematite mineralization, located 500 m to the north of Redcorp's linear anomaly, covering an area of approximately 600 by 400 m, and yielded results from below detection up to 1.14 g/t, 0.84 g/t and 0.81 g/t Au.

Further work will continue in Q3 and Q4 2013 focusing on detailed mapping and channel sampling of the silica ribs with the aim of defining potential drill targets.

### The Boticas Gold Project

Boticas is located in northern Portugal, approximately 30 km north of the Jales/Gralheira gold mine, hosted in granites with gold mineralization controlled by large-scale regional faults. The Company believes that the project has multi-million ounce gold potential in structurally-controlled and en echelon repeating dilation zones, which is a

common structural setting for gold deposits with a similar geological setting typified by the Fort Knox gold deposit in Alaska. The Fort Knox gold deposit is an active gold mine operated by Kinross and has proven and probable reserves of 314.6 Mt at 0.43 g/t gold containing 4.3 million ounces of gold (*see <http://www.kinross.com/operations/operation-fort-knox-alaska-usa.aspx> for further details*). *This mineral reserve is quoted for information purposes only and is not necessarily an indication of the potential of the Boticas project.*

The 100 sq km Boticas project area was previously explored between the 1980's and early 2000's by several companies with a total of 3,234 metres of diamond drilling completed in 26 holes. Results from the drilling include:

- 40.15m at 1.96 g/t Au from 19.30 to 59.45m, including 20.40m at 2.92 g/t Au from 20.70 to 41.10m (hole KL4);
- 64.80m at 0.42 g/t Au from 35.00 to 99.80m (hole PF2);
- 50.05m at 1.70 g/t Au from 8.65 to 58.70m, including 19.7m @ 2.80 g/t Au from 32.20 to 52.00m (Hole PF3);
- 103.60m at 0.83 g/t Au from 28.10 to 131.70 m (hole PF10);
- 75.55m at 0.92 g/t Au from 6.80 to 82.35m (hole PF11);
- 104.75m at 0.83 g/t Au from 45.50 to 150.25m (hole PF17).

The exploration drilling results will allow the Company to define drill-ready exploration targets with the opportunity to fast-track to resources. Importantly the key prospect, which has been the focus of drilling, is only one of 15 soil geochemical anomalies identified by historical grid-sampling.

Historical surface sampling has yielded results over 1 g/t Au in 9 out of 34 samples with a maximum of 204 g/t Au in a grab sample of selected veinlets, underpinning the high prospectivity of the project area.

*The drill intersections and sampling by previous companies are historical in nature, have not been verified by the Company, and are therefore quoted for information purposes only. The sample grades were topcut at 20 g/t Au before calculating intervals.*

Prior to the grant of the licence option, Medgold UK carried out evaluation work which yielded a composite channel-chip sample with a length weighted average of 3.98 g/t Au over 14.10m (channel CH001) and individual rock-chip samples up to 28.3 g/t Au over 1.70m (channel CH007) out of 58 samples, 11 of which were greater than or equal to 1.0 g/t Au. The samples were prepared by ALS Minerals at the Rosia Montana Laboratory, Romania, and analyzed for gold by fire assay with atomic adsorption finish. Samples above 10 g/t were repeated with a gravimetric finish. Multi-elements were analyzed by ICP by ALS Minerals, Vancouver. Blank, certified standard reference materials, and field and laboratory duplicates were routinely inserted for quality assurance and quality control.

The Boticas licence is expected to be issued in late Q2 2013, and the Company plans to start ground work immediately following issuance, with a drilling campaign scheduled for mid-2014.

### *Spanish Projects*

The Company has applied for three contiguous exploration permits in northwest Spain, located in the southwest corner of Galicia Province, and known as the Pinzas Gold Project. They are adjacent to an additional six pre-defined permit areas that the Company has applied for by a public tender which closed on March 15, 2013, with the outcome of the tender expected in Q2/Q3 2013.

A detailed review of the region focussed on granite-hosted orogenic gold systems and identified several significant targets, with the Pinzas area being the primary target area. The area was also extensively explored by the Romans over 2,000 years ago, who extracted gold from hundreds of projects over hundreds of years throughout the entire Iberian region.

### The Pinzas Gold Project

The Pinzas Gold Project is located in the southwest corner of the highly prospective and productive gold region of Galicia, in northwest Spain. Mineralization is hosted in granites in the Hercynian orogenic belt, which extends northwards to the advanced-stage gold project of Salave, and southwards to Boticas and the Jales-Gralheira gold mine in Portugal. Salave has measured and indicated resources of 17.9 Mt at 2.92 g/t Au for 1.68 Moz Au and inferred resources of 3.7 Mt at 2.80 g/t Au for 338 koz Au (*Source: 'Technical Report on Salave Gold Deposit,*

*Spain' by Scott Wilson RPA, 25/FEB/2010). This mineral resource is quoted for information purposes only and is not necessarily an indication of the potential of the Company's project.*

The Company has completed the application process and paid all taxes for the three exploration permits at Pinzas which are expected to be issued in Q2/Q3 2013. These permits cover approximately 79 square kilometres of free-ground and are therefore not subject to a public tender process.

Historical work undertaken within the Pinzas permit application area included rock samples collected by Ormonde Mining plc ("Ormonde") in 2005, which yielded results from below detection limit up to 11.10, 5.49 and 2.73 g/t Au in 11 samples. Mineralization is hosted within a 14 km north-south trending structural corridor where parallel quartz veins, commonly high-grade, are concentrated along fault boundaries with schistose metasediments. The structural corridor within the public tender licence area was drill-tested by a previous company in the 1980's with 3,705 m drilled in 16 holes, with gold-bearing quartz veins intersected in all drill holes. *The Ormonde sampling results and the drill results quoted here are historic and the Company has not independently verified them.* Medgold UK collected 21 rock samples in the permit application areas, with results from below detection up to 1.00 and 2.13 g/t Au.

### The Ormonde Agreement

In July 2011 Medgold UK signed a binding letter of intent (the "LOI") with Ormonde covering a 2,400 square kilometre agreement area within which Ormonde has an extensive rock and stream sediment geochemical database from samples collected in 2004-2006. Under the terms of the LOI, Medgold was provided access to Ormonde's database in return for agreeing to undertake 100,000 EUR of exploration expense, where part of this expense could be incurred through the cost of licence applications. On April 4, 2013 the BLOI was modified such that the Company now has 100% ownership of the project and on any other permits or projects acquired in the agreement area, with an obligation to pay Ormonde a 1.5% Net Smelter Royalty on any future gold production from any such projects with no further funding obligation from Ormonde. This enabled the Company to solely develop the potential of the project area which contains multiple historic workings and strong geological signatures for gold mineralization.

### Qualified Person

Dr. Stewart D. Redwood, FIMMM, Consulting Geologist to the Company, is a Qualified Person as defined in NI 43-101. Dr. Redwood has reviewed and approved the technical information contained in this MD&A, some of which is based on reports by historic workers. The Company, however, has not independently verified the results of historic workers.

### Quarterly Information

The following table provides information for the eight fiscal quarters ended March 31, 2013:

	Mar. 31, 2013 (\$)	Dec. 31, 2012 (\$)	Sep. 30, 2012 (\$)	June 30, 2012 (\$)	Mar. 31, 2012 (\$)	Dec. 31, 2011 (\$)	Sep. 30, 2011 (\$)	*June 30, 2011 (\$)
Exploration expenditures	221,493	143,515	142,293	120,993	103,270	84,809	22,776	-
General and administrative expenses	208,294	178,850	118,196	210,419	91,189	95,518	60,856	155,405
Net loss	429,787	1,254,459	260,489	331,412	194,459	180,327	83,632	155,405
Basic and diluted loss per share	0.01	0.05	0.01	0.02	0.01	0.01	0.00	0.02

\* This quarter covers the period from incorporation of Medgold UK on April 12, 2011 to June 30, 2011.

Net losses trend upwards since Medgold UK began operations during the quarter ended June 30, 2011 due in large part to the Company becoming increasingly active with exploration activities. The net loss for the quarter ended December 31, 2012 was significantly higher than other quarters presented because of a listing cost of \$932,094 resulting from the Acquisition. The net loss for the most recently completed quarter ended March 31, 2013 is higher than all other quarters presented except for the quarter ended December 31, 2012 because of its being the first entire period with consolidated operations. The net loss for the quarter ended June 30, 2012 was significantly impacted by

legal costs of \$122,566 relating to the Acquisition that were charged in that period. The quarter ended September 30, 2012 was impacted by legal costs as well but to a lesser degree than the previous quarter.

### **Results of Operations**

For the quarter ended March 31, 2013, the Company had a net loss of \$429,787 compared to a net loss of \$194,459 for the quarter ended March 31, 2012, an increase of \$235,328. Exploration costs for the current quarter were \$221,493 compared to \$103,270 for the comparative quarter, an increase of \$118,223. Exploration expenditures increased as the Company has acquired more properties.

General and administrative expenses totaled \$208,294 for the current quarter compared to \$91,189 for the comparative quarter, an increase of \$117,105. General and administrative expenses during the comparative quarter were limited to management fees, legal and accounting, and general office costs as this period was prior to the Acquisition. The current quarter had these costs plus new costs such as salaries and benefits, shareholder communications, transfer agent and regulatory fees, and travel and accommodation that commenced after the Acquisition and the consolidation of the various entities. Due to these circumstances, all general and administrative costs except for management fees increased during the current quarter. Management fees are lower as they were restructured at the time of the Acquisition.

### **Mineral Properties Expenditures**

A summary of the Company's expenditures on its mineral properties during the period ended March 31, 2013 is as follows:

Italy – A total of \$177,582 was incurred on the Company's Pietratonda and Frassine-Grasceta properties with \$86,912 of that amount being spent on geological consulting, \$73,150 on travel, and \$17,520 on assaying.

Portugal - \$6,238 in geological consulting costs were incurred on the Vila de Rei property.

Spain - \$37,673 in geological consulting costs were incurred on the Pinzas property.

### **Liquidity and Capital Resources**

The Company's cash resources increased from \$556,209 as at December 31, 2012 to \$1,130,803 as at March 31, 2013 due to the Company receiving \$975,000 in advance for a private placement of debentures which are convertible into 6,500,000 common shares of the Company at the rate of \$0.15 per share. The private placement was closed on April 12, 2013. Upon closing of the private placement, a portion of the proceeds were used towards existing liabilities and the balance is to be used for exploration expenditures and general working capital.

The Company's current capital resources are not considered sufficient to cover its corporate operating costs and carry out exploration activities for the next twelve months. In order to carry out planned exploration programs and business objectives, the Company will need to raise additional capital. Actual funding requirements may vary from those planned due to a number of factors including potential property acquisitions and exploration activity. Management believes it will be able to raise additional equity capital as required, but recognizes the uncertainty attached thereto.

### **Capital Management**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its properties and to maintain flexible capital structure for its projects for the benefit of its stakeholders. In the management of capital, the Company includes the components of shareholders' equity as well as cash and cash equivalents.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or adjust the amount of cash and cash equivalents. Management reviews the capital structure on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements.

## Financial Instruments and Risk Management

The Company is exposed through its operations to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other business, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

### **General Objectives, Policies and Processes:**

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's finance function. The Board of Directors receive periodic reports through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

#### a) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk: foreign currency risk, interest rate risk, and equity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. As at March 31, 2013, the Company is exposed to foreign currency risk and interest rate risk.

#### *Foreign Currency Risk*

As at March 31, 2013, the Company is exposed to currency risk through the following financial assets and liabilities denominated in currencies other than the Canadian dollar:

	March 31, 2013			December 31, 2012	
	British Pound Sterling (CDN equivalent)	US Dollars (CDN equivalent)	Euros (CDN equivalent)	British Pound Sterling (CDN equivalent)	US Dollars (CDN equivalent)
Cash	\$ 57,529	\$ 978,509	\$ 9,831	\$ 450,095	\$ 7,577
Accounts payable and accrued liabilities	(295,047)	-	(48,540)	(334,522)	-
Due to related parties	(57,980)	-	-	(47,725)	-
<b>Net exposure</b>	<b>\$ (295,498)</b>	<b>\$ 978,509</b>	<b>\$ (38,709)</b>	<b>\$ 67,848</b>	<b>\$ 7,577</b>

Based on the above net exposures at March 31, 2013, a 10% depreciation or appreciation of the above currencies against the Canadian dollar would approximately result in a \$64,400 increase or decrease in the Company's after tax net earnings, respectively.

#### *Interest Rate Risk*

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. As at March 31, 2013, the Company did not have any borrowings. The convertible debenture debt taken on subsequent to March 31, 2013 is subject to a fixed interest rate of 8% per annum. Interest rate risk is limited to potential decreases

on the interest rate offered on cash held with Canadian and British financial institutions. The Company considers this risk to be limited.

b) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents. The Company limits exposure to credit risk by maintaining its cash with large financial institutions. The Company does not have cash and cash equivalents that are invested in asset based commercial paper.

c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. At March 31, 2013, the Company had working capital of \$661,838 (December 31, 2012: \$148,728) available to apply against short-term business requirements.

**Determination of Fair Value:**

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The Statements of Financial Position carrying amounts for cash and cash equivalents, accounts payables and accrued liabilities, and due to related parties approximates fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

**Fair Value Hierarchy:**

Financial instruments that are measured subsequent to initial recognition at fair value are categorized in Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2	Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
Level 3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of the Company's financial assets as of March 31, 2013 were calculated as follows:

	<b>Balance at December 31, 2012</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
Financial Asset:				
Cash and cash equivalents	\$ 556,209	\$ 556,209	\$ -	\$ -

**Related Party Transactions**

The Company's related parties with transactions during the three months ended March 31, 2013 consist of directors, officers and the following companies with common directors:

<b>Related party</b>	<b>Nature of transactions</b>
Radius Gold Inc. ("Radius")	Shared office, administrative and exploration related charges
Gold Group Management Inc. ("Gold Group")	Shared office, administrative and exploration related charges
Mill Street Services Ltd. ("Mill Street")	Management services

### **Key management compensation**

The Company has identified certain of its directors and senior officers as its key management personnel. Included for the periods ended March 31, 2013 and 2012 at their exchange amounts are the following items paid or accrued to key management personnel and/or companies with common directors. These transactions are in the normal course of operations.

	<b>Three months ended March 31,</b>	
	<b>2013</b>	<b>2012</b>
Management fees	\$ 46,500	\$ 67,263
Salaries and benefits	4,583	-

Related party transactions for the period ended March 31, 2013, in addition to related party transactions disclosed elsewhere in this document, comprise the following:

- a) The Company reimbursed Gold Group, a company controlled by the Chief Executive Officer of the Company, \$69,726 (2012: \$Nil) for shared administration costs consisting of \$16,006 in general and administration, \$29,352 in salaries and benefits, \$16,857 in shareholder communications, \$202 in transfer agent and regulatory fees, and \$7,309 in travel and accommodation. An office and administrative agreement was entered into between the Company and Gold Group effective July 1, 2012 and as such, there are no amounts to present for the comparative period. Salary and benefits include those for Ralph Rushton (a Director), the Chief Financial Officer and the Corporate Secretary;
- b) Prepaid expenses and deposits include amounts of \$61,000 (December 31, 2012: \$61,000) paid to Gold Group for deposits pursuant to the office and administrative agreement and \$Nil (December 31, 2012: \$7,113) for other administrative expenses paid in advance on the Company's behalf; and
- c) Amounts due to related parties as of March 31, 2013 consist of \$93,139 (December 31, 2012: \$23,012) owing to Gold Group for accrued shared administrative costs, \$17,520 (December 31, 2012: \$17,520) owing to Radius for shared leasehold improvement and equipment costs, \$26,880 (December 31, 2012: \$16,800) owing to Mill Street, a company controlled by the Chief Executive Officer of the Company for accrued management fees, \$22,740 (December 31, 2012: \$23,863) owing to David Hall, a Director of the Company for accrued management fees, \$22,740 (December 31, 2012: \$23,862) owing to Jeremy Martin, a Director of the Company for accrued management fees, and \$12,500 (December 31, 2012 \$Nil) owing to Daniel James, a Director of the Company for current management fees. The amounts for Radius and Mill Street are unsecured, interest free and have no specific terms of repayment. The amounts for Gold Group and Daniel James are due on a monthly basis. The amounts for David Hall Jeremy Martin are due no later than December 10, 2014.

### **Other Data**

Additional information related to the Company is available for viewing at [www.sedar.com](http://www.sedar.com).

### **Share Position and Outstanding Warrants and Convertible Debentures**

As at May 28, 2013, the Company's outstanding share position is 52,416,078 common shares and the following share purchase warrants and convertible debentures are outstanding:

<b>No. of warrants</b>	<b>Exercise price</b>	<b>Expiry date</b>
6,500,000	\$0.15	April 11, 2014

  

<b>No. of debentures</b>	<b>Conversion rate</b>	<b>Expiry date</b>
6,500,000	\$0.15	April 11, 2015

As at March 31, 2013 and May 28, 2013, there were no outstanding stock options.

### **Critical Accounting Estimates and Judgments**

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors,

including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive loss in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

The key areas of judgment applied in the preparation of the financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- a) The determination of the Company's functional currency;
- b) The carrying value of the investment in exploration and evaluation assets and the recoverability of the carrying value;
- c) Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects; and
- d) Although the Company has taken steps to identify any decommissioning liabilities related to mineral properties in which it has an interest, there may be unidentified decommissioning liabilities present.

The key estimates applied in the preparation of the financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- a) The Company may be subject to income tax in several jurisdictions and significant judgment is required in determining the provision for income taxes. During the ordinary course of business and on dispositions of mineral property or interests therein, there are transactions and calculations for which the ultimate tax determination is uncertain. As a result, the Company recognizes tax liabilities based on estimates of whether additional taxes and interest will be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events, and interpretation of tax law. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact income tax expense in the period in which such determination is made;
- b) In estimating the fair value of share-based payments management is required to make certain assumptions and estimates. Changes in assumptions used to estimate fair value could result in materially different results.

### **Adoption of New and Amended IFRS Pronouncements**

#### *IAS 1 Presentation of Financial Statements (Amendment)*

The amendments to IAS 1 require the grouping of items within other comprehensive income that may be reclassified to profit or loss and those that will not be reclassified. The statement of comprehensive income in these condensed interim consolidated financial statements has been amended to reflect the presentation requirements under the amended IAS 1.

The mandatory adoption of the following new and revised accounting standards and interpretations on January 1, 2013 had no significant impact on the Company's financial statements for the current or prior periods presented:

#### *IFRS 10 Consolidated Financial Statements*

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under previous IFRS, consolidation was required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 Consolidation - Special Purpose Entities and parts of IAS 27 Consolidated and Separate Financial Statements.

#### *IFRS 11 Joint Arrangements*

IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under previous IFRS, entities had the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11

supersedes IAS 31 Interests in Joint Ventures and SIC-13 Jointly Controlled Entities - Non-monetary Contributions by Venturers.

#### *IFRS 12 Disclosure of Interests in Other Entities*

IFRS 12 establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities.

#### *IFRS 13 Fair Value Measurement*

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under previous IFRS, guidance on measuring and disclosing fair value was dispersed among the specific standards requiring fair value measurements and in many cases did not reflect a clear measurement basis or consistent disclosures.

#### *Amendments to other standards*

In addition, there have been other amendments to existing standards, including IAS 19 *Post-Employment Benefits*, IAS 27 *Separate Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*. IAS 27 addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. IAS 28 has been amended to include joint ventures in its scope and to address the changes in IFRS 10 to IFRS 13.

### **Future Accounting Changes**

The following new standard has been issued by the IASB but is not yet effective:

#### *IFRS 9 Financial Instruments*

IFRS 9 is part of the IASB's wider project to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015. The Company is in the process of evaluating the impact of the new standard.

### **Risks and Uncertainties**

#### *Mineral Property Exploration and Mining Risks*

The business of mineral deposit exploration and extraction involves a high degree of risk. Few properties that are explored ultimately become producing mines. At present, none of the Company's properties has a known commercial ore deposit. The main operating risks include: securing adequate funding to maintain and advance exploration properties; ensuring ownership of and access to mineral properties by confirmation that option agreements, claims and leases are in good standing; and obtaining permits for drilling and other exploration activities.

#### *Joint Venture Funding Risk*

The Company's strategy includes seeking partners through joint ventures to fund exploration and project development. The main risk of this strategy is that funding partners may not be able to raise sufficient capital in order to satisfy exploration and other expenditure terms in a particular joint venture agreement. As a result, exploration and development of one or more of the Company's property interests may be delayed depending on whether the Company can find another partner or has enough capital resources to fund the exploration and development on its own.

#### *Commodity Price Risk*

The Company is exposed to commodity price risk. Declines in the market price of gold, base metals and other minerals may adversely affect the Company's ability to raise capital or attract joint venture partners in order to fund its ongoing operations. Commodity price declines could also reduce the amount the Company would receive on the disposition of one of its mineral properties to a third party.

#### *Financing and Share Price Fluctuation Risks*

The Company has limited financial resources, has no source of operating cash flow and has no assurance that additional funding will be available to it for further exploration and development of its projects. Further exploration and development of one or more of the Company's projects may be dependent upon the Company's ability to obtain financing through equity or debt financing or other means. Failure to obtain this financing could result in delay or indefinite postponement of further exploration and development of its projects which could result in the loss of one or more of its properties.

Securities markets have at times in the past experienced a high degree of price and volume volatility, and the market price of securities of many companies, particularly those considered to be exploration stage companies such as the Company, have experienced wide fluctuations in share prices which have not necessarily been related to their operating performance, underlying asset values or prospects. There can be no assurance that these kinds of share price fluctuations will not occur in the future, and if they do occur, how severe the impact may be on the Company's ability to raise additional funds through equity issues and corresponding effect on the Company's financial position.

#### *Political, Regulatory and Currency Risks*

The Company's mineral properties are located in economically stressed, but politically stable Western European countries and consequently may be subject to a higher level of risk compared to less economically stressed countries. Operations, the status of mineral property rights, title to the properties and the recoverability of amounts shown for mineral properties in such nations can be affected by changing economic, regulatory and political situations. The Company's equity financings are sourced in Canadian dollars but for the most part it incurs its exploration expenditures in British pound sterling and Euros. At this time there are no currency hedges in place. Therefore a weakening of the Canadian dollar against the British pound sterling or Euro could have an adverse impact on the amount of exploration conducted.

#### *Insured and Uninsured Risks*

In the course of exploration, development and production of mineral properties, the Company is subject to a number of hazards and risks in general, including adverse environmental conditions, operational accidents, labor disputes, unusual or unexpected geological conditions, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods, and earthquakes. Such occurrences could result in damage to the Company's properties or facilities and equipment, personal injury or death, environmental damage to properties of the Company or others, delays, monetary losses and possible legal liability.

Although the Company may maintain insurance to protect against certain risks in such amounts as it considers reasonable, its insurance may not cover all the potential risks associated with its operations. The Company may also be unable to maintain insurance to cover these risks at economically feasible premiums or for other reasons. Should such liabilities arise, they could reduce or eliminate future profitability and result in increased costs, have a material adverse effect on the Company's results and a decline in the value of the securities of the Company.

#### *Environmental and Social Risks*

The activities of the Company are subject to environmental regulations issued and enforced by government agencies. Environmental legislation is evolving in a manner that will require stricter standards and enforcement and involve increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects, and a heightened degree of responsibility for companies and their officers, directors and employees. There can be no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations. Environmental hazards may exist on properties in which the Company holds interests which are unknown to the Company at present. Social risks are not considered significant in the Company's areas of operations.

*Competition*

The Company will compete with many companies and individuals that have substantially greater financial and technical resources than the Company for the acquisition and development of its projects as well as for the recruitment and retention of qualified employees.
